Past performance is not an indicator or a guarantee of future performance. All performance data shown is in the currency stated, include reinvested dividends and are net of management fees. Sales charges and other commissions, taxes and other relevant costs paid by the investor are not included in the calculations.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

The share class shown has adopted a hedging strategy intended to reduce the effect of exchange rate movements between the currency of the Fund's investment strategy and the currency of the share class. The benchmark returns displayed are shown in the reference currency of the Fund's investment strategy (USD), while share class returns are shown in the reference currency of share class (EUR). As a result, the returns shown above reflect the effect of the hedging strategy and one can compare the returns of the Fund (net of fees) relative to its benchmark index without the impact of exchange rate movements on index returns.

Portfolio Data Derivatives Disclosures

Market value figures reflect the trading value of the investments. Notional exposure figures are intended to estimate the portfolio's exposure, including any hedged or increased exposure through certain derivatives held in the portfolio (or their underlying reference assets). Average Duration, Average Weighted Maturity and Yield to Maturity reflect certain derivatives held in the portfolio (or their underlying reference assets). Portfolio breakdown percentages may not total 100% and may be negative due to rounding, use of any derivatives, unsettled trades or other factors.

What are the Key Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested.

Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments.

All performance data shown is in the Fund currency stated and include reinvested dividends and are net of management fees. Sales charges and other commissions, taxes and other relevant costs incurred on the issue and redemption of units paid by the investor are not included in the calculations.

Fund Measures: The average credit quality (ACQ) rating may change over time. The portfolio itself has not been rated by an independent rating agency. The letter rating, which may be based on bond ratings from different agencies (or internal ratings for unrated bonds, cash and equivalents), is provided to indicate the average credit rating of the portfolio's underlying investments and generally ranges from AAA (highest) to D (lowest). For unrated bonds, cash and equivalents, ratings may be assigned based on the ratings of the issuer, the ratings of the underlying holdings of a pooled investment vehicle, or other relevant factors. The ACQ is determined by assigning a sequential integer to all credit ratings AAA to D, taking a simple, asset-weighted average of investments by market value and rounding to the nearest rating. The risk of default increases as a bond's rating decreases, so the ACQ provided is not a statistical measurement of the portfolio's default risk because a simple, weighted average does not measure the increasing level of risk from lower-rated bonds. The ACQ may be lower if cash and equivalents are excluded from the calculation. The ACQ is provided for informational purposes only. Derivative positions are not reflected in the ACQ.

TER: A fund's Total Expense Ratio (TER) is a measure of its total costs and fees expressed as a percentage of the average net assets of the fund in the previous financial year and with reference to the asset class shown in the performance table. As of 31 January 2019. Calculation method according to Luxembourg law. The TER as of fiscal year-end is published in the latest available annual report and the latest semi-annual report, if published thereafter, for Switzerland and is calculated according to SFAMA guidelines.

Distribution of Dividends: The Board of Directors intends to distribute all of the income attributable to the Distribution Shares. No distribution of dividends shall be made for the Accumulation Shares (**acc**), however the income attributable will be reflected in the increased value of the Shares. Dividends may be paid monthly (**Mdis**), quarterly (**Qdis**), or annually (**Ydis**).
