What is this product?

Type

The product is a share class of the Sub-fund Franklin Sustainable Euro Green Corp 1-5 Year UCITS ETF (the "Fund") which is part of the Franklin Templeton ICAV (the "Umbrella Fund"), an Irish collective asset-management vehicle constituted as an umbrella fund with segregated liability between Sub-Funds with registration number C167746 and authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011.

Term

The Fund has no maturity date. The Fund could be closed under the conditions laid down in the current prospectus of the Fund.

Objectives

Investment Objective

To pursue a sustainable investment objective, by providing exposure primarily to the European corporate green bond market with a short to mid duration of less than 5 years, whilst maximising total returns.

Investment Policy

The Fund invests mainly in bonds that are labelled green and denominated in European currencies. The proceeds of such investments will typically contribute to an environmental objective of reducing and eliminating carbon emissions, by engaging in activities such as, but not limited to, generation or use of renewable energy, efficient use of energy, reduction of GHG emissions, carbon efficient modes of transportation.

Under normal market conditions, the Fund invests a minimum of 75% of assets in corporate green bonds (bonds whose proceeds finance environmental projects) with a maturity between 1 and 5 years and denominated in, or hedged, to EUR. Such bonds can have both fixed or floating rates and can be issued by both corporate and, to a lesser extent, governmental issuers, including governmental agencies and quasi sovereigns. To a lesser extent, the Fund may invest in other types of sustainable bonds, such as social bonds.

Derivatives and techniques The Fund may use derivatives for hedging, efficient portfolio management and investment purposes.

Strategy In a top-down and bottom-up process, the investment manager uses macroeconomic, interest rate and credit analysis to identify securities that appear to offer the best return for their risk level.

Sustainable investing The Fund employs a proprietary ESG rating methodology with the aim of avoiding investment in issuers that are lagging in the transition to support a low-carbon economy. The ESG rating methodology is applied to at least 90% of the Sub-Fund's portfolio and is binding for the portfolio construction.

SFDR category Article 9 (sustainable investment objective under EU regulations).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity to pay you.
