Franklin Global Aggregate Bond Fund

Class A (Mdis) EUR • ISIN LU0543369697 • A sub-fund of Franklin Templeton Investment Funds
The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin Global Aggregate Bond Fund (the “Fund”) aims to maximise the investment return by achieving an increase in the value of its investments and earning income over the medium to long term.

The Fund invests mainly in:

- higher-quality debt securities issued by governments, government-related entities and corporations located in any country

The Fund can invest to a lesser extent in:

- lower-quality debt securities (limited to 10% of assets)
- emerging-market debt securities
- mortgage- and asset-backed securities
- Mainland China through the Bond Connect or directly (limited to 10% of assets)

The Fund can use derivatives for hedging, efficient portfolio management and/or investment purposes (limited to 40% of assets).

The Fund aims to maximise investment return over the medium to long term through a combination of income, capital appreciation and currency gains while approximating the benchmark (Bloomberg Barclays Global Aggregate Index) risk. The Fund invests in a large number of small, low-correlated investments to reduce the risk from any single investment.

You may request the sale of your shares on any Luxembourg business day.

For the distribution share class shown in this document, dividend income is distributed to shareholders.

For further information on the Objectives and Investment Policy of the Fund, please refer to the section “Fund Information, Objectives and Investment Policies” of the current prospectus of Franklin Templeton Investment Funds.

The benchmark of the Fund is the Bloomberg Barclays Global Aggregate Index. The benchmark is indicated for information purposes only, and the Fund manager does not intend to track it. The Fund can deviate from this benchmark.

Terms to Understand

Asset-backed securities: Debt securities whose value and income payments are derived from a pool of underlying assets.

Derivatives: Financial instruments whose characteristics and value depend on the performance of one or more underlying assets, typically securities, indexes, currencies or interest rates.

Hedging: A strategy for totally or partially offsetting particular risks such as those arising from fluctuations in share prices, currencies or interest rates.

Mortgage-backed securities: Securities whose value and income payments are derived from the ownership of a pool of underlying mortgage debts.

Debt securities: Securities representing the issuer’s obligation to repay a loan at a specified date and to pay interest.

Emerging markets: Countries whose economy, stock market, political situation and regulatory framework are not fully developed.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in debt securities issued by any government or corporation worldwide. Such securities have historically been subject to price movements, generally due to interest rates or movements in the bond market.

As a result, the performance of the Fund can fluctuate over time.

Risks materially relevant not adequately captured by the indicator:

Credit risk: the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, non-investment-grade securities.

Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Derivatives risk: the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the “Risk Considerations” section of the current prospectus of Franklin Templeton Investment Funds.
